

This table is designed for depth gauges that are not altitude adjustable. If your gauge is altitude adjustable and/or reads in terms of fresh water, you should use one of the other tables since this table will not give you a proper safety or emergency decompression stop depth.

Non-Altitude adjustable depth gauges are NOT recommended for diving at altitude.

WARNING: Proper training and certification in altitude diving is required and critical prior to using these tables as these are only depth conversion tables and other altitude procedures that are learned in an altitude diving class are critical or a serious injury or death is possible and has in fact resulted from altitude diving.

Diving is an inherently dangerous activity and any dive, even when properly planned, with or without this table, may result in serious injury or death. These tables are conversion tables only and are only as valid or safe as the ocean dive table chosen to be converted. So it is up to the individual diver as to how conservative to dive their chosen table as all tables can result in injuries including decompression sickness and death. All dive tables will result in decompression sickness in a small percentage of divers.

There are no safety margins built into these tables and they do not account for either an altitude ascent before or after a dive or inaccurate depth gauge reading.

These tables are UNTESTED and are instead based upon recognized altitude conversion formulas and are used at your own risk.

NO WARRANTY IS EXPRESSED OR IMPLIED WITH THIS TABLE, INCLUDING THAT IT IS FIT FOR A PARTICULAR PURPOSE.

For other depths, altitudes and nitrox conversions at altitude, software is available at www.diverssupport.com.

NON-ALTITUDE ADJUSTABLE GAUGE DEPTHS (Feet)

1,000	1,500	2,000	2,500	3,000	3,500	4,000	4,500	5,000	5,500	Equivalent Ocean Depth (EOD)
27	26	25	24	23	22	21	20	19	18	30
32	31	30	29	27	26	25	24	23	22	35
37	36	34	33	32	31	30	28	27	26	40
47	45	44	42	41	39	38	37	35	34	50
56	54	53	51	50	48	47	45	44	42	60
66	64	62	60	59	57	55	54	52	51	70
75	73	72	70	68	66	64	62	60	59	80
85	83	81	79	77	75	73	71	69	67	90
95	92	90	88	86	83	81	79	77	75	100
104	102	99	97	95	92	90	88	85	83	110
114	111	109	106	104	101	99	96	94	91	120
124	121	118	115	113	110	107	105	102	100	130
133	130	127	124	121	119	116	113	110	108	140

DECOMPRESSION / SAFETY STOP DEPTHS

9	8	7	6	6	5	4	4	3	2	10
14	13	12	11	10	9	9	8	7	6	15
18	17	16	16	15	14	13	12	11	11	20

This table is designed for depth gauges that are not altitude adjustable.
